

Helicopter Tactical Flying Lesson

The helicopter tactical lesson provides you with an opportunity to take the controls of an Robinson R44 helicopter under the supervision of an instructor who will sit alongside. You will make a short flight in this way followed by a further two flights as an observer whilst occupying one of the rear seats.

Before the flight you will receive a briefing and an explanation of what to expect.

The experience lasts for about 45min with up to 20min in the air. You will experience three take-offs and landings in total.

You will receive a certificate afterwards for the period spent at the controls.

The helicopter tactical lesson is administered by Adventure001
